## VOORJAAR 2020

We remember 1968, the student revolution in Paris. We remember the Prague Spring, a foreshadowing, so full of anticipation, of the later glasnost. We remember the spring of 1979, with weather so severe that the Northern Netherlands were snowed in. How will we remember the spring of 2020?

In April this year, Winnie Teschmacher, director of project space De Ketelfactory in Schiedam, posed this question to all artists who have worked with De Ketelfactory in the past. How do you spend your time? What do you see? What are the memories that rise to the surface in the privacy of your studio, home and garden? How do you view the future, the world, life?

Fifty artists responded. Fifty artists created a cahier in which they reflect playfully and seriously, conceptually and anecdotally, in gossamer watercolour and stunning poetry, in photographs and in story, upon the spring of 2020, which was so very different and more intense than any we have experienced.

The result is an exceptional box of fifty beautiful booklets, designed by Berry van Gerwen. The box will be available from mid-July for a mere 25 euros (plus shipping). It is possible to pre-register via [info@deketelfactory.nl](mailto:info@deketelfactory.nl).
